

Creating a Turnitin® Assignment in Momentum Dropbox

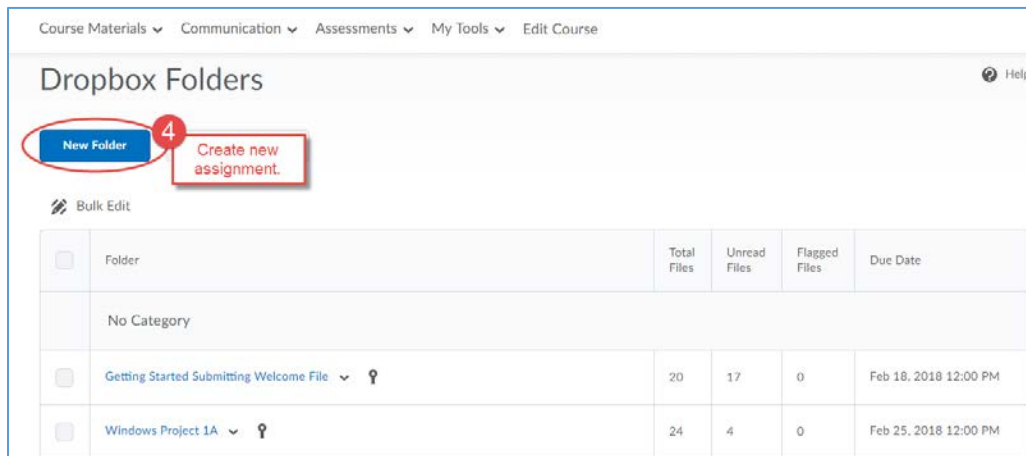

Step One:

Select the course where the assignment will be created, click the “Assessment” dropdown on the course homepage, and choose “Dropbox”.

Step Two:

Select “New Folder” to create a new assignment.

Step Three:

Provide the assignment with a name and select relevant properties. You are able to add the following properties:

Properties Tab:

- Category
- Grade association
- Point value
- Add rubric
- Include instructions
- Attach files
- Submission options

Restrictions Tab:

- Change visibility *
- Create due dates and availability
- Add release conditions
- Allow special access (if needed)

* The default for visibility is set as “hidden from users”. In order for students to view and submit an assignment, this radio button must be deselected.

Step Four:

Click on the Turnitin® tab.

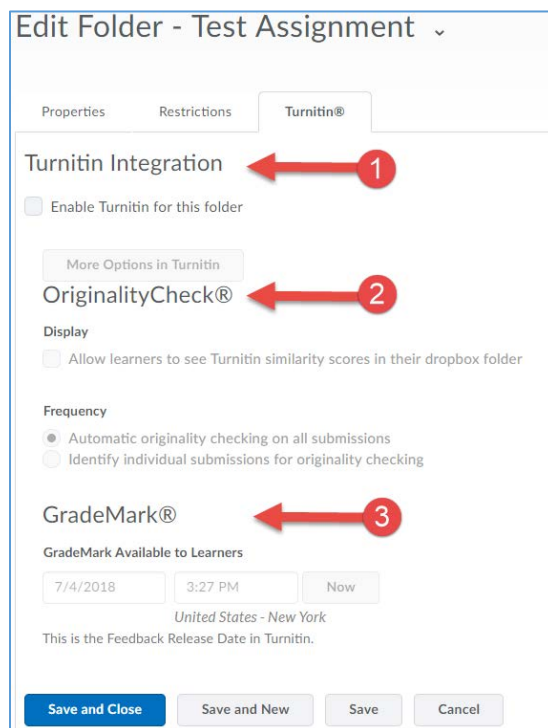

Step Five:

Click the radio button to “Enable Turnitin® for this folder”.

Click the radio button to “Allow learners to see Turnitin® similarity scores in their Dropbox folder”. (OriginalityCheck® is an optional feature.)

If you plan to provide feedback using the GradeMark® tool within Turnitin®, then you must add a release date for availability to learners.

Step Six:

Click “Save and Close”.
