# Creating a File Page in Content

Instructors can create an HTML page in their Momentum Content

1. In Momentum Content, select the module where the new file will be added.

2. Select **New**.

3. From the dropdown menu, select **Create a File**

4. In the Create a File page, enter a **Title**.

5. Enter content in the main textbox.

6. Select **Save and Close** when done editing.
