Editing Inserted Elements or Practices

1. In the Content tool, select the dropdown menu next to the existing Content File that has Elements or Practices within it.
2. Select **Edit HTML**.

3. In the HTML editor, select an Element or Practice that you have added.
4. Select **Edit** using the pencil icon next to the Element or Practice to open the editing interface. You can also move it up or down for an order change or delete.

5. Make any edits and then select **Preview**.
6. Select **Insert** when ready.
7. Select **Save and Close** when done editing the page.
